PROFESSIONAL SUMMARY

AWS Certified Solutions Architect with 2+ years of hands-on experience in cloud operations, technical support, and infrastructure administration across AWS and Azure. Skilled in Tier 2/3 incident resolution, end-to-end troubleshooting across networking, authentication, and application layers, and proactive system health monitoring. Strong background in AWS IAM, Active Directory, Azure AD / Entra ID, SAML based SSO, and hybrid identity — directly applicable to AWS WorkSpaces, Web environments. Experienced in implementing least-privilege IAM, MFA, conditional access, and zero-trust security principles. Proven ability to document SOPs, collaborate cross-functionally with Security, Networking and communicate clearly with Clients during incident management.

TECHNICAL SKILLS

AWS EUC & Core:	AWS WorkSpaces · AppStream 2.0 · WorkSpaces Web · EC2 · S3 · RDS · Lambda · Route53 · SES · CloudFront · CloudWatch · SSM · AWS CLI
Identity & Auth:	AWS IAM (least-privilege, RBAC) · AWS Directory Service · Azure AD / Entra ID · Active Directory (on-prem & hybrid) · SAML · OIDC · SSO / Federation · MFA · Conditional Access · Zero-Trust
Networking:	VPC · Subnets · Security Groups · NACLs · NAT/IGW · DNS · Routing · Load Balancing (ALB/NLB) · Firewalls · VPN · Hybrid Connectivity
Observability & Support:	AWS CloudWatch (dashboards, alarms, log insights) · Azure Monitor · Proactive alerting · Incident response · RCA · Tier 2/3 troubleshooting · SOP documentation
Security & Compliance:	IAM least-privilege · MFA · Conditional access · Zero-trust frameworks · HIPAA / HITRUST / SOC awareness · AWS security primitives
Automation & Scripting:	Python · PowerShell · Bash · AWS CLI · Terraform · AWS CloudFormation · Ansible · AWS Lambda (event-driven)
CI/CD & DevOps:	GitHub Actions · AWS CodePipeline · AWS SSM · Azure DevOps · Git
OS & Servers:	Linux · Windows Server · Windows Client troubleshooting · Active Directory administration
Databases:	Amazon RDS (MySQL / PostgreSQL) · Multi-AZ · Read Replicas · Automated Backups

PROFESSIONAL EXPERIENCE

IT Admin (Cloud Infrastructure) · Zodopt Technology Solutions Pvt. Ltd.

Feb 2025 – Present | Bengaluru, India

- Provided Tier 2/3 operational support for AWS cloud environments (EC2, RDS, ALB, VPC, Auto Scaling) — diagnosing and resolving complex issues across networking, authentication, and application layers for multiple SaaS client environments.
- Administered AWS IAM roles, policies, and least-privilege RBAC controls; implemented MFA and zero-trust security principles across cloud workloads — ensuring consistent enforcement of security and access standards.
- Managed hybrid identity integration using Azure AD / Entra ID with SAML/OIDC-based SSO — directly applicable to AWS WorkSpaces and AppStream 2.0 identity federation and secure authentication workflows.
- Monitored system health, availability, and performance via CloudWatch dashboards and alarms; implemented proactive alerting to detect and prevent downtime before impact to end-users.
- Led incident response end-to-end — triaging critical production issues across infra, networking, and application code; drove root cause analysis and documented findings as internal knowledge base articles and SOPs.
- Built Python and Bash automation scripts and PowerShell workflows to eliminate operational toil, streamline recurring support tasks, and improve response times for common incident patterns.
- Provisioned and managed infrastructure using Terraform and AWS CloudFormation — ensuring consistent, version-controlled environments aligned with security and compliance requirements.
- Integrated AWS Lambda for event-driven operational automation; built CI/CD pipelines with GitHub Actions and AWS SSM for reliable, SSH-free deployments with full audit trails.

- Generated structured cost optimisation and performance reports — supporting data-driven decisions across engineering and stakeholder teams.

Technical Engineer · Amity University

Nov 2023 – Feb 2025 | Bengaluru, India

- Delivered Tier 2 technical support for Windows and Linux server environments, sustaining 99%+ uptime across critical enterprise applications — taking end-to-end ownership of incident resolution and escalation.
- Administered Active Directory for 500+ users; led hybrid identity integration between on-prem AD and Azure AD (Entra ID) — managing SSO federation, RBAC, and conditional access policies for seamless cross-environment authentication.
- Troubleshoot Windows client/server issues, endpoint profile problems, and network connectivity across VPN and corporate LAN — mirroring the troubleshooting scope of virtual desktop and WorkSpaces environments.
- Wrote PowerShell and Python automation scripts to streamline administrative tasks — reducing manual intervention, improving SLA adherence, and enabling self-service workflows for end-users.
- Collaborated with Security and Networking teams to enforce least-privilege access, MFA rollout, and compliance with internal security standards.
- Contributed to AWS migration planning and cloud modernisation — documenting SOPs and supporting adoption of cloud-native services aligned with FedRAMP and security compliance frameworks.

KEY PROJECTS

VisitorPass – Cloud-Based SaaS Platform with Secure Identity & Access

Stack: React · Node.js(Express) · MySQL · AWS(ALB,EC2,RDS,S3,SES,SSM) · Terraform · GitHub Actions · Python · JWT

- Architected a full-stack SaaS platform on AWS 3-tier architecture (ALB → EC2 → RDS) with private VPC — designed for multi-tenant secure access, directly analogous to WorkSpaces/AppStream 2.0 deployment patterns.
- Implemented JWT-based authentication with SSO-ready modular design; integrated AWS SES for automated user communication workflows and AWS SSM for secure, SSH-free operational access.
- Built end-to-end CI/CD with GitHub Actions for automated deployments; wrote Python automation for operational workflows, monitoring, and proactive incident detection with CloudWatch.

CampusKart – AWS Multi-Tier Application with Observability & Security Controls

Stack: React · Node.js(Express) · MySQL · AWS(CloudFront,S3,ALB,EC2,RDS) · JWT · Python · CloudWatch

- Built production-grade VPC networking with public/private subnet isolation, security groups, NACLs, and CloudFront CDN — enforcing network-layer security controls consistent with zero-trust principles.
- Configured CloudWatch monitoring, dashboards, and alerting pipelines; wrote Python scripts for performance tuning, cost optimisation, and proactive issue detection — reducing mean time to resolution.

CERTIFICATIONS & EDUCATION

Certifications

- AWS Certified Solutions Architect – Associate
- AWS Partner: Technical Accredited

Education

- Master of Computer Science · Mandya University · 2021–2023
- Bachelor of Science · Mysore University · 2018–2021
