AWS Certified Solutions Architect – Associate with practical exposure to designing, deploying, and troubleshooting scalable cloud environments using AWS services including EC2, VPC, IAM, RDS, Route 53, Security Groups, and Application Load Balancers (ALB). Strong understanding of cloud networking, security, identity & access management, Linux environments, and infrastructure troubleshooting. Passionate about Cloud Engineering, AWS Infrastructure, automation, SaaS platforms, and modern cloud technologies. Experienced in working with Zoho ecosystem and SaaS operations including user management, access provisioning, platform administration, troubleshooting, workflow support, and cloud-based business applications. Core Skills: AWS | EC2 | IAM | VPC | RDS | ALB | Route 53 | Linux | Cloud Networking | Cloud Security | SaaS Operations | Zoho | Infrastructure Management | System Administration | Troubleshooting | Cloud Support | SQL | Terraform | CI CD | Git | Linux | Shell/Bash Scripting | Docker | Infrastructure as Code | Cloudwatch | monitoring and alerting

Experience

Zodopt Technology Solutions Pvt Ltd
Information Technology Administrator
February 2025 - Present (1 year 6 months)
Rajajinagar Bengaluru

Managed cloud-based SaaS environments and supported cloud infrastructure operations for internal and client environments.

Assisted in administration and troubleshooting of AWS cloud resources including EC2, IAM, VPC, RDS, Security Groups, and Load Balancer configurations.

Monitored cloud applications, infrastructure availability, and system performance to ensure operational stability and uptime.

Worked on DNS management, MX records, domain configurations, routing, and cloud connectivity troubleshooting.

Administered user access, IAM permissions, role-based access control, and security policies across cloud and SaaS platforms.

Supported deployment, configuration, and troubleshooting of cloud-hosted applications and services.

Managed Zoho ecosystem administration including user provisioning, access management, workflow configuration, security settings, and SaaS platform support.

Performed infrastructure and networking troubleshooting involving VPN, DNS, TCP/IP, firewall access, and connectivity issues.

Collaborated with teams on cloud operations, SaaS onboarding, infrastructure support, and incident resolution activities.

Maintained operational documentation, troubleshooting procedures, and cloud support processes for internal teams and clients.

Amity University Bengaluru

Technical Engineer

November 2023 - January 2025 (1 year 3 months)

Bengaluru

Provided technical support for end users across Windows/Linux systems and network infrastructure.

Troubleshot DNS, VPN, firewall, and connectivity-related issues.

Assisted users with system configuration, software setup, and troubleshooting.

Collaborated with teams for issue escalation and resolution tracking.

Documented recurring issues and troubleshooting procedures.

Education

Mandya University

Master's degree, Computer Science · (January 2022 - October 2023)
